## ALLIES STRIKE WITHOUT WARNING TO FORM UNITED LINE

# British, Iranian Resisting

# Red Army Counter - Attacks Nazis In Heavy Fighting

### Campaign To Oust Nazis In Country

Forces Landed From Ships In Bandar-Shahpur Sector Of Iranian Gulf Advancing, But Distance Of Penetration Unknown

By EDWARD W. BEATTIE, JR.  
LONDON, Aug. 25.—(AP)—British and Russian army forces struck into Iran without warning today and were reported meeting resistance in their campaign to oust German agents and protect the Red army's oil fields and supply lines.

Authoritative British sources said that the Imperial forces, consisting of troops from the British Isles and India, had encountered opposition in the first stage of the invasion, which included the landing of forces from British ships at the head of the Iranian Gulf.

"Resistance has been encountered but it is not known where or how serious it is," according to the statement made here.

The forces landed from ships in the Bandar-Shahpur sector of the Iranian Gulf were said to be advancing but it was not known how far they had penetrated from the coast.

GEN. WAVELL  
The terminus of the railroad to Ahwas and Tehran. British troops marched into Iran under the supreme command of Gen. Sir Archibald Wavell, commander-in-chief in India, it was said authoritatively.

For military reasons informants declined to disclose the composition of the British striking force or the commander-in-chief on the spot.

### Advances Are Aimed At Oil Centres

The British sea landing at Bandar-Shahpur as well as the mechanized land advance from Iraq were designed to move quickly into the Iranian oil centres, as well as to secure the main railroad line over which supplies from America and elsewhere might be sent to Russia.

An advance of around 100 miles would put the British in control of the main oil centres. Russian forces moving down from the Caspian and other British units from India supplemented the main attack.

News also was lacking of progress on other sectors of the front but authorities said that the entire Iranian army probably did not exceed 150,000 men, including one armored brigade with tanks (apparently of Czech origin) and two or three well-trained and well-equipped infantry divisions.

### Begin Without Warning At Dawn

The British-Russian occupation operations began at dawn along the ancient near eastern caravan routes where tanks, truck columns and airplanes were sent into action to wipe out the danger of a German coup that would threaten the Russian oil fields in the Caucasus.

Not until dawn, when the Red and Imperial armies were advancing in tanks and trucks, did Russia and Britain notify Iran of their move.

Through the foreign office at Moscow, Iran was informed that the Russian and British forces were moving in and was given assurances that they had no designs on Iran and would get out as soon as the danger of a German coup had been removed.

Announcement of the first joint British-Russian military operation of the war, a little more than two months after Germany attacked Russia June 22, was made by the Moscow radio, in a broadcast picked up by the British United Press telegraph post, and was later confirmed by the British government.

In entering Iran, Britain abandoned the graceful and slow-moving diplomacy of past decades, it was said.

### Red Army Counter - Attacks Nazis In Heavy Fighting

MOSCOW, Aug. 25.—(AP)—General Red army counter-attacks with large tanks, masses of infantry and self-propelled artillery were reported today by the Russians as Soviet naval forces claimed the sinking of two out of four heavily laden German troop and munition transports in the Baltic sea.

The Russians said one Russian and two German divisions were routed and that three other Russian divisions took 13,000 men. Besides the two transports at

securing destroyer was sunk, the other grounded, it was stated. Another, the Russians said, was smashed back in the Gornel sector of the central front in a terrific Sunday-dawn assault by the Red army.

Continued on Page 5, Col. 1

links and infantry supported by Red air fleet bombers. The Russian forces were reported in the last-fifth hour of Sunday's Black Sea port of Odessa while further east in the Ukraine Red army cavalry units were hurled into the fight for vital bridge-heads in the Dniester river bend.

The Soviet Bureau of Information reported today heavy fighting continued throughout last night in the Kakhovka and Novgorod approaches. Continued on Page 5, Col. 1

### CITY RESIDENT, CHILDREN ARE MISSING

## Believed Drowned In Boat Found Upturned In Cooking Lake

### Delegates Of Bondholders To Meet Province

Delegates representing Alberta bondholders to study with the government ways and means of refunding the provincial public debt were released Monday by H. L. Spence, secretary of the Northern Alberta Bondholders and Savings Committee.

The committee is formed of government and bondholders representatives and is the outcome of a conference held two weeks ago at the legislative building.

Bondholders nominees to the committee are: Courtland Elliott, Toronto; H. W. Talbot, Newark, New Jersey; U.S.A., H. A. Howard, Calgary; and R. D. Tice, of the city. Provincial representatives are Hon. Solon E. Low, provincial treasurer; Hon. W. R. Cross, minister of health and in charge of relief; Hon. W. E. Tanner, minister of lands and mines and J. F. Perch, deputy provincial treasurer.

First meeting of the joint committee is scheduled for this city on September 1st, according to a recent announcement by Mr. Low.

Mr. Elliott is a widely known statistician and financial expert and is a member of the staff of Ames & Co., Toronto brokers. Mr. Talbot represents United States bondholders and was a member of the bondholders delegation which interviewed Premier Abernethy and members of his cabinet recently to arrange for establishment of the joint committee. Mr. Howard is a financial authority and Mr. Tice is chairman of the Northern Alberta bondholders protective organization.

In announcing names of their delegates, the bondholders stated that "it was with the intention to Continued on Page 5, Col. 1

### Mr. Churchill Welcomes Mr. King To London

Prime Minister Winston Churchill, left, welcomes Prime Minister Mackenzie King on the latter's arrival in London last week. This picture was sent to New York by cable.

### Premier Churchill Says:

## Britain Will Join U.S. to Stop Japs

LONDON, Aug. 25.—(CP)—Prime Minister Churchill, describing Hitler as "surprised, startled and staggered" at the bloody cost of the German invasion of Russia, declared in a broadcast Sunday night that Britain would join the United States in action against Japan, the Asiatic partner, if the Japanese proceed in aggression.

In the speech, his first public utterance since the historic conference with President Roosevelt in the Atlantic two weeks ago, it was implied that Germany is too involved upon the great plains of Russia to turn now to another sphere of war.

Mr. Churchill estimated that "perhaps 1,500,000, perhaps 2,000,000" Germans had fallen in the nine-week campaign, and said that the invaders were retreating with literally "scores of thousands of mutilated" Russian prisoners.

"But Europe is not the only continent," he said, "where the Japanese are making their way."

He recalled the results of the "Nazi 'one way' strategy—the ill of nations overcome slightly—and the term of the United States would come if Russia and Britain could be disposed of."

In some diplomatic quarters, this part of his speech was interpreted as an effort to bring home to the people of the United States a realization of the undiminished gravity of the situation.

### Believed Drowned

A sailboat in which an Edmonton man and three teen-aged children were lost Sunday afternoon in South Cooking Lake, 22 miles east of the city, was found shortly before noon Monday. The boat, which was overturned in the middle of the lake, was found with its mast stuck in the mud on the bottom. At 2 p.m. Monday a R.C.M.P. and a large number of helpers were attempting to right the boat, and were searching in the vicinity for the bodies of the missing people.

The boat was located six or seven miles east of the airplane base, off a part of the shore known as Scotts Bay.

POWER BOATS USED  
Neville Robertson, manager of the airplane base, in his power boat, was located, discovered the missing boat at the same time it was located from the shore.

Two power boats and several rowboats and sailboats were used in the search. Eight divers employed by H. G. McDonald and company, contractors, fell into the water of Mr. Blair, father of the missing boy, on Monday morning by Mr. McDonald and assisted in the search. They took two boats with them.

Mr. Robertson, in charge of the airplane base, said that the boat was an extremely blundering and a bad day for sailing. Mr. Robertson is at the airplane base waiting for word from the search. R.C.M.P. took grappling equipment with them.

The party left a beach on Mr. Robertson's farm that is about a mile north of Lake. Continued on Page 5, Col. 1

### Japs To Tolerate U.S. Aid To Soviet

SHANGHAI, Aug. 25.—(AP)—A French dispatch from Tokyo quoted well-informed quarters today that the Japanese government had decided to tolerate temporarily the passage of United States war materials to Vladivostok.

The shipments, which must go through waters controlled by the Japanese navy, the dispatch said, will be used as a lever to obtain relaxation of United States economic restrictions on Japan.

Japan was expected to seek a Moscow guarantee not to use American arms against Japan, according to this source, and not to participate in the alleged British-American encirclement.

### Sardinia Raided By British Planes

ROME, Aug. 25.—(AP)—British planes dropped explosive and incendiary bombs on Tempio, near Sassari, in Sardinia, Saturday night, the Italian high command reported today. It said one civilian was killed and four were injured.

### Interpreting War News

By KIRK L. KEMPSON  
Associated Press Staff Writer  
PRIME Minister Churchill suggested some interesting answers to the question "under what circumstances would the United States fight?" and in one respect, at least, his thoughts ran strikingly parallel to those of an American spokesman.

Mr. Churchill, in his broadcast address Sunday, made it clear that in his opinion the United States would fight Japan—and thus probably be drawn into the general war in the Orient and threaten the Philippines. And he warned the Japanese that Britain would range her might alongside the United States.

Another circumstance under which the United States probably would fight—in Mr. Churchill's apparent opinion certainly should—would be if the Japanese were to attack the United States.

### British Carrying Food To Iranians

SIMLA, India, Aug. 25.—(AP)—British troops entering Iran are carrying food supplies for the population, British sources said today, because the country is reported in a state of near-famine from heavy German food requisitioning, presumably for storage.

A statement issued by Gen. Sir Archibald Wavell, commander-in-chief, said the British-Indian entrance into Iran was decided upon to prevent the Germans from using the country as a base for attacks upon the Middle East. It gave no details.

### McLarty Treated

OTTAWA, Aug. 25.—(CP)—Labor Minister McLarty is in hospital undergoing treatment for an eye condition, which has been troubling him for a short time, it was learned today.

### MacKinnon Party Reaches Ecuador

GUAYAQUIL, Ecuador, Aug. 25.—(CP)—Trade Minister James A. MacKinnon and the Canadian trade mission arrived here Sunday from New York to resume a four-day short last winter by Mr. MacKinnon's illness. The trade mission is accorded honors usually conferred by the state on visiting foreign secretaries of other nations.

## EVERY HOUSEHOLD TRAINED TO WATCH FOR SABOTEURS

## Russia Has Efficient System of Coping With Spies

## Government Has Several Million Pairs Of Eyes Working In Its Behalf

By A. T. STEELE

Copyright, 1941, by the Chicago Daily News, Inc.

The Edmonton Bulletin

MOSCOW, Aug. 25.—(CND)—The Soviet government has devised an extraordinarily efficient system of coping with spies and saboteurs. Every household is trained to watch for suspicious strangers and the inhabitants of every building are expected to maintain day and night guard in their neighborhood.

## Delegates Of Bondholders To Meet Province

Continued from Page One

hold the first meeting of the committee with the committee appointed by the government in August 26. It was, however, impossible to do so as Mr. Elliott was engaged in important work for the Dominion government which was unable to release him to be here earlier than Sept. 16. Under these unfavorable circumstances, the provincial government at the request of the committee, approved of an adjournment to that date.

## INTEREST MATURITIES

The joint government-bondholders committee will discuss ways and means of refunding the public debt of \$147,000,000. It will also discuss ways and means of securing a lower interest rate on the bonds and the disposition of more than \$10,000,000 in maturities which now stand in default.

It is expected that the Dominion government will take over the income and corporation taxes in the fiscal year ended next in December 31, 1940.

The Dominion government made alternate offers.

Under the "A" offer, the Dominion will reimburse the province in the amount equal to that received by the province from the combined income of the income and corporation taxes in the fiscal year ended next in December 31, 1940.

This plan would yield the province about \$4,000,000, which is the same as the loss in the two years in 1940.

Under the "B" offer, the Dominion agrees to pay the province a sum equal to that actually paid by the province to the federal government in 1940, totalling \$3,000,000. This interest was paid on the basis of 50 per cent of the combined tax apportioning on the bonds.

Provincial officials declared that new developments had taken place regarding the Dominion offer.

## Recruiting Heads Talk New Plans

OTTAWA, Aug. 25.—(CP)—

Recruiting officials from all military districts met in Ottawa today to discuss headquarters today to discuss methods of obtaining men for army service.

The defence department, it is understood, is anxious to keep up the flow of men into the army attained during the recent recruiting drive which went over its objective of 32,000 men for a two-month period.

The head for men in the army was 32,000 men. It was stated at headquarters today, and the recruiting drive continued on in July and August.

It is a temporary drive but one designed to set the pace for permanent recruiting activity.

## Four Feared Drowned in Cooking Lake

Continued from Page One

view on the east shore at 3 p.m. Sunday.

Returned boat, thought to have been the one occupied by the missing persons, was sighted by a plane from No. 2 Air Observer School in Edmonton, that was making a routine flight for co-pilot training over the lake.

The boat was floating in about the middle of the lake, those in the plane reported. They were searching for the boat in the city of Lakeview, which is about 10 miles from the shore. At the same time it was seen by the men in the plane.

W. R. "Wo" May, manager of the flying school, was on the plane that reported the boat. They were flying at an altitude of about 1,000 feet.

There was no sign of any living persons on or near the upturned boat.

Place from where the boat set sail along the north shore of Lakeview in a stretch known as the narrow. It is about four miles, as the crow flies, from the north shore of Lakeview, but a considerable distance from the shore, which is about 10 miles from the shore.

Mr. Christensen had purchased the boat for about \$1,000. He was planning to use it for a while.

Mr. Christensen had purchased the boat for about \$1,

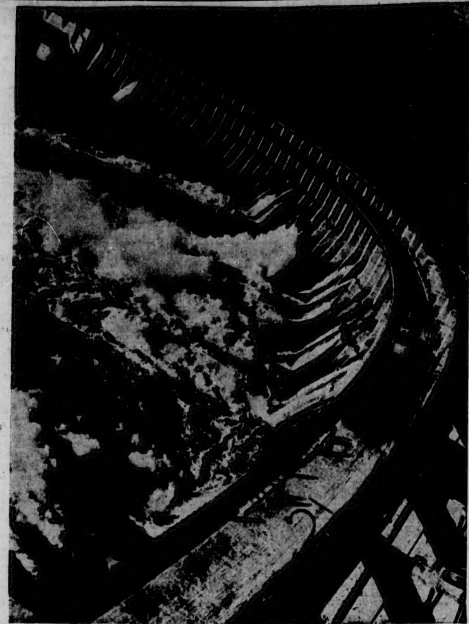

## WARPLANES AND TROOPS ON THE MOVE IN MIDDLE EAST

Signs of major action ahead in the middle east include massing of troops there by Britain and opening of a new warplane ferry service from the U.S. to that area. Map at left shows present North Atlantic air ferries, and the roundabout route American-built planes will take to the middle east to avoid flying over war zones. Above is a "flying wing," one of many types of planes being ferried, pictured somewhere over De Gaulle's French Equatorial Africa where Lake Chad is a stop on the new ferry route. At controls of this odd plane, according to British caption, is famed ferry pilot J. A. Mollison. The ship has no fuselage, and passengers are carried in centre section of the wing.

Evidence that Britain is spotting her troops in strategic points in the middle east is this picture from the border between British-held Syria and Turkey. Tommy on patrol shows off his armored car to three curious Turkish troops.

This is the gigantic Dnieper Dam, pride of the Soviet, which it is reported has been blown up by retreating Russian forces to stem the German advance in the Ukraine. The blowing up of the huge dam unleashed a wall of water against the Nazis and gave the Soviet an opportunity to prepare new defensive positions.

## British Tommies Keep Their Powder Dry

Here to survey timber conditions, Sir James Calder said that Britain now depends almost entirely on Canada for its timber.

Preparing for "the time when we shall strike the enemy wherever we find him," British infantrymen undergo tough training in swim across an English stream in full kit. Note how rifle barrels are rested on packs and thus kept clear of the water. Maybe these boys will swim in a fjord or Dutch canal some day.

## Leningrad Gets Some Good War News

If the citizens within the Soviet Union hear as many conflicting war claims from the Russians and Germans as do Americans, here's one bit of news they can be sure of. It's a captured German plane, just put on exhibit in the main square of Leningrad, the Soviet Union's second city. Photo was flashed from Moscow to New York by radio.

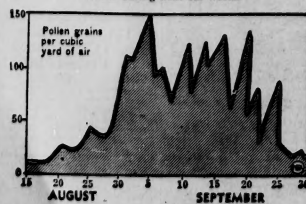

## Lady Logroller

August is boom time for Peggy Klauz, 16-year-old Kelo, Wash., high school girl. With caulked boots and rolled pant legs, she joins lumberjacks in keeping Cowlitz river log boom moving.

It's hay fever time again, and the allergic are beginning to identify themselves with the familiar pass-word—"kerchoo!" Particles of pollen from ragweed, goldenrod, and miscellaneous weeds are beginning to tickle noses like that of the girl above. Chart below, based on pollen count of typical hay fever city, shows when to expect worst attacks during next six weeks.

## Nazi-Red War Enters Third Month

Two months of Russo-German conflict have swept by—the first, one of quick victories for Nazis in buffer areas seized by Soviet last year; the second, one of slow advances along a stiffer, 1200-mile Red front. Map shows penetration of German troops since June 22, and current threat to Leningrad, Moscow, Kiev and Odessa.

## Parley On Tactics

French owners of dogs and other pets who no longer have the wherewithal to provide food for these animals, may bring them to the animal refuge at Lyon where they are provided for. This owner is turning his dog over to the refuge, comforted by the thought that the animal will be fed, although he, himself, may go hungry.

Maj. Gen. Jacob L. Devers, extreme right, confers at Ft. Knox, Ky., with high officers, on methods of coordinating ground, aerial operations. He heads U.S. Armored Force.
